

Unit04 Slider with Responsive Images(10 pts)

Add a responsive image slider on the home page and remove the default page title.

Responsive image slider

Reuse the responsive images slider from a previous unit.

- [Slick Slider](#) with swipe capability for mobile and drag capability for desktop.
- A square image shows on small screens and a horizontal image shows on medium and large screens.

Plugin Title Remover

Install the "Title Remover" plugin.

- After installing the title remover plugin, use it to remove the title from the home page so the slider touches the navigation bar.

Unit05 Lazy load Gallery10 points

Add a "Service Area" page to your site.

Lazy Load Gallery

Add a photo gallery of 12 countries.

- Create 12 images that are 1200px wide and the same height
- Modify the Word Press template to add the necessary js code to make the lazy load work.
- Add all 12 images to a new "Service Area" page
- Add this page to the Word Press main menu bar
